PROFILE

Software and game developer with professional Unity/C# experience, freelance game delivery and programming instruction. Develops interactive prototypes and technical simulations, writes requirements, investigates defects and tests releases. Uses Git and AI-assisted development tools to manage implementation and review.

TECHNICAL SKILLS

Programming and engines: C#, Unity, Godot, GDScript; Python for project scripts; object-oriented programming
Development workflow: Git/GitHub, Linux, VS Code, ChatGPT and Codex; task specifications, testing, debugging and documentation
Platforms and research: Android/web builds, gameplay UI, numerical simulation, ESP32-S3 sensor experimentation

EXPERIENCE

Unity Developer Intern | Gracywoods Games | Oct 2024 - Apr 2025

- Developed a card-memorization minigame in Unity/C# for integration into a larger game.
- Worked with art and technical teammates to implement and adjust gameplay features.

Freelance Game Developer | 2023 - 2024

- Delivered an educational game for a preschool client; discussed learning requirements and revised features from client feedback.

Online Coding Teacher | BrightChamps | Jan - Jul 2024

- Taught coding to students aged 6-17 in Indonesian and English, including live troubleshooting and project guidance.

Game Developer Intern | SLB B Yakut Purwokerto | 2022

- Developed educational gameplay for students with special needs, adapting content to teaching requirements.

Mobile Programming Practical Class Assistant | 2022

- Led weekly mobile programming practicals for more than 30 students.

PROJECTS

Ball Battalion | Godot, Android and Web | 2026

- Developed and tested a puzzle-defense game prototype with custom touch controls; prepared signed Android and web builds. Used structured AI coding tasks and regression testing.

Egg Heat Transfer and Evaporation Model | Master's research | 2026

- Designed a two-dimensional finite-volume model for heat transfer and water loss in a chicken egg, with numerical testing and parameter sensitivity studies.

Wi-Fi CSI Motion Sensing | ESP32-S3, Python, Linux | 2026

- Collected sensor data in repeated quiet/movement trials and evaluated calibration thresholds, false detections and missed events.

Astraventus: Kartikaris | Unity | 2026

- Prototyped radar and mech-artillery concepts in a procedurally populated forest environment.

EDUCATION

Institut Teknologi Bandung | Master's program in Electrical Engineering | 2024 - Present
Jenderal Soedirman University | Bachelor of Informatics, GPA 3.79/4.00 | 2019 - 2023

LANGUAGES

Indonesian (native) | English (EF SET C2; TOEFL 610)
